

mysql performance optimization for restart and connection

skip-name-resolve

To your MySQL configuration file (my.ini/my.cnf) and then be sure to reload (restart) the MySQL database server. The '[mysqld]' section of the my.cnf file now looks like this:

```
[crayon-669ele005eae658102165/]
```

From Microsoft Windows this can be done from the 'Services' window in 'Administrative tools' or in Debian/Ubuntu entering this command:

```
[crayon-669ele005eaf6360666934/]
```
