

Update two parameters in for loop

```
using System;

class CommaOp1
{
    const int StartChar = 33;
    const int EndChar = 125;
    const int CharactersPerLine = 5;

    static public void Main()
    {
        for (int i = StartChar, j = 1; i <= EndChar; i++, j++) {
            Console.Write("{0}={1} ", i, (char)i); if (0 == (j %
            CharactersPerLine)) { Console.WriteLine(""); } } } } [/csharp]
```
