Ftp ACL (Access Control Lists) - restricted FTP access

What is ACL ?

When you enable it , only selected ips have access to FTP server as a client. it is for security of FTP. if some one stole your FTP.

How to ? It is depends on your FTP provider. But if you have own linux server.

access-list 101 permit tcp any any eq 21

!--- The above line permits TCP traffic from any source, such as the FTP client,

!--- FTP server destination at the FTP control port 21.

access-list 101 permit tcp any eq 20 any

!--- The above line permits TCP traffic from any source, such as the FTP server,

!--- FTP client at FTP data port 20.
