

Keycloak –4 REST API

To be able to create a new user account using REST API we will need to first acquire an access token from Keycloak server. To acquire an access token, we can use the *admin* user name and password of the *master* realm.

```
[crayon-6684a69ca32ca794894658/]
```

Response

```
[crayon-6684a69ca32d5518720686/]
```

You can use this access token in the following request to create a new user account for any other existing *Realm*.
