

Android 4.0.4 Ainol Novo elf 2, Root Files Download-Tested

Rooting Steps:

- 1).Copy the file and paste it to TF card, then insert the TF card to Ainol Novo 7 Elf II.
- 2).Keep Ainol Novo 7 Elf II off and don't connect power adaptor and cable. Press -volume and power buttons at the same time till the tablet is started.
- 3).Enter recovery update mode.
- 4).Use volume button to choose "apply update from sdcard" first and then choose "elf2_root.zip", confirm your chosen with power button.
- 5).Choose "reboot system now" and restart Ainol Novo 7 Elf II.

elf2_feiyu_mod_ (0608)

- * Based on official 0606 (main firmware)/0607 (upgrade kit)
- * Deodexed And Zipaligned
- * More smooth and optimized version of native Launcher
- * Supports power on running etc/init.d script
- * Pre-installed programs written to the data area, can be directly uninstalled
- * Root And Super User
- * Working Flash
- * Full Google Play Store (+ other GApps)
- * device name changed to GT-I9100 (Galaxy S2 for gaming)
- * The browser homepage changed to Ainol official forum
- * Several preinstalled utilitys/apps
- * The default open ADB debugging, close the touch vibration
- * Other optimizations

- * Home key to back, long press for home
- * Can be set to hide the notification bar, the default is set to auto-hide (change in settings-display)
- * Change the recovery keys for volume keys move up and down, home button to confirm

INSTALL

- * Please copy all files to the SD card
- * Shut down then boot into recovery (Press and Hold the - Volume and power button for four seconds at the same time.)
- * Do a full wipe in recovery (media , cache , data)
- * Install elf2_feiyu_mod_(0608).zip,
- * and then install the elf2_feiyu_mod_(0608)_update
- * Reboot (Not sure if you need to wipe cache again before reboot???)
- * Starts slow for the first time, please be patient
