

Ftp ACL (Access Control Lists) – restricted FTP access

What is ACL ?

When you enable it , only selected ips have access to FTP server as a client. it is for security of FTP. if some one stole your FTP.

How to ? It is depends on your FTP provider. But if you have own linux server.

```
access-list 101 permit tcp any any eq 21
!--- The above line permits TCP traffic from any source, such
as the FTP client,
!--- FTP server destination at the FTP control port 21.
```

```
access-list 101 permit tcp any eq 20 any
!--- The above line permits TCP traffic from any source, such
as the FTP server,
!--- FTP client at FTP data port 20.
```

Example Document :

[HP_ACCESS_CONTROL_Ch3_ACL](#)
