

# Linux Sound Card HDMI problems

**1. How can I change the default audio device from command line?**

- Normally Gui of Ubuntu allows you to do that (System->Preferences->Sound), like the default input/output device and setting the volume.

**If that not works**

[crayon-6684c6556a8c9714582828/]

**2. Use The AlsaMixer**

F1 – Help

F2 – System Information

F6 – Select Sound Card

Esc – Exit the menu

**3. Show the all of the sound devices**

[crayon-6684c6556a8d1842005207/]

[crayon-6684c6556a8d3690055300/]

[crayon-6684c6556a8d7678820678/]

**Other Option list cards**

[crayon-6684c6556a8da402061118/]

**4. Change it from GRUB**

[crayon-6684c6556a8dd944413874/]

**5. Change the config files and test it by Command Line**

[crayon-6684c6556a8df454545878/]

[crayon-6684c6556a8e1525409330/]

**Reconfigure again for sound-base**

[crayon-6684c6556a8e3935288102/]

Restart PC test again, It works on my pc.

This test is very important to find which sound card you need to use, 1, and 3 is important first is Device other is port.
