

Virtual machine resize Disk Volume Group

KVM

```
[crayon-662f89913df8e204106144/]
```

Important for us

```
[crayon-662f89913df96778770821/]
```

```
[crayon-662f89913df99062440984/]
```

****>> Free PE / Size 5120 / 20.00 GiB**

So Firstly we are extending volume group

```
# lvextend -l +5120 /dev/telekom_kutayzorlu_com-vg/root
```

After Resize to see Action in Disk Size Now

```
# resize2fs /dev/telekom_kutayzorlu_com-vg/root
```

If you are using XFS file format it will give error so use that

```
# xfs_growfs /dev/telekom_kutayzorlu_com-vg/root
```

```
[crayon-662f89913df9d574783060/]
```
