

Virtual machine resize Disk Volume Group

KVM

```
[crayon-669e1e77b5b2f299101820/]
```

Important for us

```
[crayon-669e1e77b5b37834247505/]
```

```
[crayon-669e1e77b5b3a541684538/]
```

```
**>> Free PE / Size 5120 / 20.00 GiB
```

So Firstly we are extending volume group

```
# lvextend -l +5120 /dev/telekom_kutayzorlu_com-vg/root
```

After Resize to see Action in Disk Size Now

```
# resize2fs /dev/telekom_kutayzorlu_com-vg/root
```

If you are using XFS file format it will give error so use that

```
# xfs_growfs /dev/telekom_kutayzorlu_com-vg/root
```

```
[crayon-669e1e77b5b3c405532799/]
```
