

waiting for network configuration error

I have found the cause of this is having any interfaces defined in /etc/network/interfaces (besides lo) defined as auto. To correct this problem, the recommended solution is to remove your interfaces from this file, and set them up with network manager. Leaving /etc/network/interfaces looking like the default:

```
[crayon-67d16a10ab1e2996109683/]
```

Around 25 lines down in the file you will see a section:

```
[crayon-67d16a10ab1ee053139044/]
```

```
[crayon-67d16a10ab1f2385482085/]
```
