waiting for network configuration error

I have found the cause of this is having any interfaces defined in /etc/network/interfaces (besides lo) defined as auto. To correct this problem, the recommended solution is to remove your interfaces from this file, and set them up with network manager. Leaving /etc/network/interfaces looking like the default:

[crayon-669e1bc2e4b7a480948436/]

Around 25 lines down in the file you will see a section:

[crayon-669e1bc2e4b81971048382/]

[crayon-669e1bc2e4b84726843226/]
