

# DHCP server with NAT

# DHCP Client

**#1. DHCP sunucusuna giren adamin, ping atabilmesi icin, asagidaki komutu yazmasi gerekir. NAmeserver olarak dhcp sunucusunu vermesi gerekir.**

**nameserver 172.20.0.1**

**# bunu yazdiktan sonra ping atiyor. ama Dosya indiremiyor.**

## DHCP SERVER

# If the client wants to connect internet, The DHCP server should enable ip forwarding, after that

should SET default GATeway to NAT router GW.

route add default gw 192.168.122.1

**route add default gw 192.168.122.1**
