

Create DataView through DataTable

```
using System;
using System.Data;
using System.Data.SqlClient;

class DataViewExample
{
    static void Main()
    {
        string connString =
        "server=(local)SQLEXPRESS;database=MyDatabase;Integrated
        Security=SSPI";
        string sql = @"select * from employee";
        SqlConnection conn = new SqlConnection(connString);

        try {
            SqlDataAdapter da = new SqlDataAdapter();
            da.SelectCommand = new SqlCommand(sql, conn);

            DataSet ds = new DataSet();
            da.Fill(ds, "employee");

            DataTable dt = ds.Tables["employee"];

            DataView dv = new DataView(dt,"lastname = 'Z'", "lastname",
            DataViewRowState.CurrentRows);

            foreach (DataRowView drv in dv)
            {
                for (int i = 0; i < dv.Table.Columns.Count; i++){
                    Console.Write(drv[i] + " "); } } } catch(Exception e) {
                    Console.WriteLine("Error: " + e); } finally { conn.Close(); }
            } } [/csharp]
```
