*/
// Use break with a foreach.

using System;

public class ForeachDemo1 {
public static void Main() {
int sum = 0;
int[] nums = new int[10];

// give nums some values
for(int i = 0; i < 10; i++) nums[i] = i; // use foreach to
display and sum the values foreach(int x in nums) {
Console.WriteLine("Value is: " + x); sum += x; if(x == 4)
break; // stop the loop when 4 is obtained }
Console.WriteLine("Summation of first 5 elements: " + sum); }
} [/csharp]
```
