

# Use params to mark parameter

```
using System;
```

```
class ParamsSample {  
    static void PrintStrings(params String[] StringArray) {  
        for (int i = 0; i < StringArray.Length; i++)  
            Console.Write("{0} ", StringArray[i]); Console.WriteLine(); }  
    static void Main(String[] args) { String names = "K";  
        PrintStrings("A");    PrintStrings(names, "R", "S");  
        PrintStrings("R", "E", "C", "S"); } } [/csharp]
```
