

Do some leap year checks

```
using System;
using System.Globalization;

class MainClass {
public static void Main() {

//
int[] years = { 1984, 2000, 1999, 2002 };
for (int i = 0; i < years.Length; ++i) { if
(DateTime.IsLeapYear(years[i])) Console.WriteLine("Year {0} is
a leap year", years[i]); else Console.WriteLine("Year {0} is
NOT a leap year", years[i]); } } } [/csharp]
```
