

Read a line of string and check its length

```
using System;

class MainEntryPoint {
    static void Main(string[] args) {
        Console.WriteLine("Type in a string");
        string input;
        input = Console.ReadLine();
        if (input == "") {
            Console.WriteLine("You typed in an empty string");
        } else if (input.Length < 5) { Console.WriteLine("The string had less than 5 characters"); } else if (input.Length < 10) {
            Console.WriteLine("The string had at least 5 but less than 10 characters");
        } Console.WriteLine("The string was " + input);
    } } [/csharp]
```
