

Remove 5 Row with RowDefinitions.RemoveRange

Grid Column and Row Collections

Remove 5 Rows

```
//File:Window.xaml.cs

using System;
using System.Windows;
using System.Windows.Controls;
using System.Windows.Documents;

namespace WpfApplication1
{
    public partial class Window1 : Window
```

```
{
RowDefinition rowDef1;
ColumnDefinition colDef1;

private void rem5Row(object sender, RoutedEventArgs e)
{
if (grid1.RowDefinitions.Count < 5) { Console.WriteLine("less
than 5!"); } else { grid1.RowDefinitions.RemoveRange(0, 5); }
} } } [/csharp]
```
