

Remove One Column

Grid Column and Row Collections

Remove One Column

```
//File:Window.xaml.cs

using System;
using System.Windows;
using System.Windows.Controls;
using System.Windows.Documents;

namespace WpfApplication1
{
    public partial class Window1 : Window
    {
        RowDefinition rowDef1;
```

```
ColumnDefinition colDef1;
```

```
private void removeCol(object sender, RoutedEventArgs e)
```

```
{  
if (grid1.ColumnDefinitions.Count <= 0) {  
Console.WriteLine("No More Columns to Remove!"); } else {  
grid1.ColumnDefinitions.RemoveAt(0); } } } } [/csharp]
```
