

Remove One Row

Grid Column and Row Collections

Remove One Row

```
//File:Window.xaml.cs

using System;
using System.Windows;
using System.Windows.Controls;
using System.Windows.Documents;

namespace WpfApplication1
{
    public partial class Window1 : Window
    {
        RowDefinition rowDef1;
```

```
ColumnDefinition colDef1;
```

```
private void removeRow(object sender, RoutedEventArgs e)
{
    if (grid1.RowDefinitions.Count <= 0) { Console.WriteLine("No
More Rows to Remove!"); } else {
    grid1.RowDefinitions.RemoveAt(0); } } } } [/csharp]
```
