

Check the parameter in constructor

```
using System;

public class Class1 {
public static void Main(string[] args) {
Student student = new Student("AAA", 1234);
Console.WriteLine("Welcome new student {0}",
student.GetString());
}
}

public class Student {
string sStudentName;
int nStudentID;
int nCreditHours;

public Student(string sName, int nID) {
if (sName == null) {
sName = "invalid";
}
sStudentName = sName;

if (nID < 0) { nID = 0; } nStudentID = nID; nCreditHours = 0;
} public string GetString() { string s =
String.Format("{0}({1})",sStudentName, nStudentID); return s;
} } [/csharp]
```
