namespace DiscoveryLogic.Common.Numeric
{
    public class Arrays : System.Object
    {

        ///

    }
}
```

Returns a string representation of the specified array. The string
/// representation consists of a list of the arrays's elements, enclosed in square brackets
/// ("[]"). Adjacent elements are separated by the characters
/// ", " (comma and space).

```
///
/// a string representation of the specified array.
///
public static System.String ToString(float[] array)
{
