*/
// Demonstrate string arrays.

using System;

public class StringArrays {
public static void Main() {
string[] str = { "This", "is", "a", "test." };

Console.WriteLine("Original array: ");
for(int i=0; i < str.Length; i++) Console.Write(str[i] + " ");
Console.WriteLine(" "); // change a string str[1] = "was";
str[3] = "test, too!"; Console.WriteLine("Modified array: ");
for(int i=0; i < str.Length; i++) Console.Write(str[i] + " ");
} } [/csharp]
```
