

displays a conversion table of Fahrenheit to Celsius

```
/*
This program displays a conversion
table of Fahrenheit to Celsius.

Call this program FtoCTable.cs.
*/

using System;

public class FtoCTable {
public static void Main() {
double f, c;
int counter;

counter = 0;
for(f = 0.0; f < 100.0; f++) { c = 5.0 / 9.0 * (f - 32.0); //
convert to Celsius Console.WriteLine(f + " degrees Fahrenheit
is " + c + " degrees Celsius."); counter++; // every 10th
line, print a blank line if(counter == 10) {
Console.WriteLine(); counter = 0; // reset the line counter }
} } } [/csharp]
```
