

Business SIP SERVER Companies

Business

The project hosts a public mailing list that can be used for business discussions:

- business@lists.kamailio.org

The Kamailio project maintains a directory listing companies and individuals offering commercial products, services or solutions based on Kamailio:

- Business Directory

VoIP-Info.org maintains wiki pages about Kamailio consultants:

- Kamailio Consultants
- SER Consultants

Individuals and companies tightly involved in development of the project are offering telephony services (VoIP), consultancy, training, solutions and products:

- <http://www.lund1.de>
- <http://www.asipto.com>
- <http://dev.sipdoc.net/users/3>
- <https://edvina.net>
- <http://www.evaristesys.com>

- <http://www.sipgate.de>
- <http://www.sipwise.com>
- <https://tutpro.com>
- <http://www.voipembedded.com>
- <http://www.voztele.com>

Typical use cases:

- standalone SIP server to provide telephony services for large subscribers base
- scaling SIP IP PBX services (e.g., such as those using Asterisk PBX, CallWeaver or FreeSWITCH)
- SIP Load Balancer and Failure Routing system
- SIP Least Cost Routing system
- SIP Trunking services
- SIP SIMPLE Presence and Instant Messaging server
- WebRTC integration to Kamailio and other SIP servers
- development of new Unified Communication services and integration with Web 2.0

For further relations please contact the Management Team.

SIP Services

For those looking to get a SIP address, here is a list of providers that are known to use Kamailio or SER and allow public registration:

- openrcs.com – maintained by few Kamailio developers (server located in Germany)
- voipuser.org – maintained by few Kamailio community members
- iptel.org – maintained by SEMS developers
- ekiga.net – maintained by Ekiga project developers

If you run a SIP service that uses Kamailio or SER and want to be listed here, write an email to our mailing list:
